Web Tech: PWA, SEO Optimization, HTML/CSS, Mobile-First Development

Tools & DBs: MongoDB

Core Skills: Frontend Development, Full-Stack Architecture, Troubleshooting, Attention to Detail

Professional Experience

Spondise Company

Frontend Developer

April 2023 – May 2026

- Engineered and maintained robust web applications utilizing Laravel Blade and Nuxt3 to deliver seamless user experiences and optimize backend performance.
- Designed responsive, mobile-first interfaces using Bootstrap, ensuring cross-browser compatibility and accessibility.
- Developed and deployed Progressive Web Applications (PWAs) to enhance offline capabilities, loading speeds, and overall mobile performance.
- Implemented comprehensive technical SEO strategies, significantly improving platform visibility and search engine rankings.

Workbean (Employer Branding Company)

Software Engineer

March 2022 – May 2023

- Spearheaded Workbean's mobile-first development initiatives, ensuring optimal performance and user experience across all devices.
- Translated design prototypes into functional, high-fidelity web pages, maintaining strict adherence to UI/UX specifications.
- Architected scalable and reusable code components to accelerate future development cycles for the company's SaaS platform.
- Rapidly acquired and implemented new programming languages and frameworks to support simultaneous product developments.

Personal Projects

E-commerce: Architected a full-stack e-commerce website utilizing React.js, Node.js, Express, and MongoDB.

Notetify: Developed a Flutter-based mobile application designed to send automated academic reminders and manage student notes.

Inventory: Built a Python application to efficiently track sales data and monitor product inventory levels.

Grade Portal: Created a secure Java application allowing students to independently access and view their academic scores without manual instructor intervention.
